

## Dip Tubing Cut to Size.

### NO CHARGE ON SELECT PRODUCTS!

McKernan Packaging Clearing House is able to offer custom dip tube lengths for most fine mist sprayers, lotion pumps, treatment pumps, foamer pumps, and trigger sprayers. McKernan has over 20 machines in our warehouse dedicated to customizing dip tubes.

For dip tubes that are too long, McKernan has the capability to cut a majority of sprayers and pumps for a fee. Additional charges may be necessary for sprayers and pumps that are outside of the standard or for metal shelled items.

If the dip tube is too short, McKernan can replace it with a longer dip tube. There is a nominal charge for each step in the process, not including the cost of new tubing. For example: a tube needs to be 4 inches long, instead of 2 inches. There is a charge to remove the 2-inch tube, another charge to place the new tube, a charge to cut the new tube to 4 inches, plus the cost of the new tubing.

For more information on rework charges, the processes, or timelines, please contact your sales representative at **1-800-787-7587** or **775-356-6111**.
