

Types of Pumps

Treatment Pumps - HP

- Treatment Pumps are perfect for dispensing a variety of low-dose products with outputs ranging from 130 mcl to 200 mcl
- Precision dosages and attractive aesthetics make them ideal for targeted hair-care and skin-care applications
- McKernan carries a variety of sizes and colors to choose from

Foamers - HV

- Easy to actuate, Foamers create a propellant-free foam with a simple pump gesture. This makes foamers ideal for body care, sun care, skin care and hair care applications
- McKernan stocks Foamer Pumps in 30mm, 40mm and 43mm finishes and offers a variety of bottles to match

Lotion Pumps - HL

- Lotion Pumps offer superior viscosity, flexibility and priming capabilities to everything from creams and tonics to hair-care products and liquid soaps
- McKernan offers a wide range of Lotion Pumps, from standard 1.2cc to 30cc dispensing systems

38/400 Lotion Pumps - HL

These 38/400 lotion pumps are great in salons' back bar for dispensing detergents, soaps, and shampoos. They are often seen in the food industry for dispensing sauces and toppings. This type of pump features a stainless steel spring and an optional threaded chaplet allowing the pump to be unassembled and reassembled for rinsing and cleaning. The large, flat dispensing head with an extended spout also makes it easier to dispense product from bigger containers.

Showerproof Lotion Pumps - HL

Showerproof pumps are perfect packaging for use in the bath and shower. These pumps have high outputs making them ideal for shampoos, conditioners and body washes. The structure of this water ingress pump enables venting without allowing water to enter the container, reducing the risk of bacteria.
